

Provide your local government officials with a comprehensive overview of what they should be looking to include in your town/village/city's 5G wireless telecommunications ordinance to better control the local 5G rollout process.

1) a) Is there currently a 5G wireless telecommunications ordinance?

b) If so, then where can the ordinance be found?

c) If not, then has the Metro Nashville Mayor's Office and/or City Council proposed such an ordinance? I am attaching a checklist (PDF format) of items that I hope will be considered for inclusion in such an ordinance.

2) a) Have any 5G wireless telecommunications facilities been installed anywhere within the boundaries of Metro Nashville-Davidson County?

b) If so, then have there been reports of any negative health impacts from nearby residents?

I am enclosing below a couple of useful Web resources on both alternatives to 5G and some public health safety issues concerning the roll-out of 5G wireless telecommunications facilities.
