

## Afterword

How was the journey? Now that you've reached the end of this book I'll offer some parting thoughts.

Why have I decided to publish this personal book in this age of mega surveillance by the galactic/global elite? It's simple – this book is a vehicle for my personal healing and it may be useful for others in their healing journey too. In addition, the antidote to the surveillance is not for us to disconnect from each other and to live in isolated fear, but it is for us to reconnect with each other, remember who we really are, and be FREE. (I am including other antidotes, in the form of resources, at the end of this section.)

Along with the massive surveillance, we are in an age of geoengineering (chemtrails, etc.), radiochemical releases, mind control/manipulation (including mis- and dis-information), and other forms of electromagnetic pollution. I ask that all beings working on these and other negatively destructive projects to reclaim your loving Soul and to cease working on those projects.

I recommend that we continue practicing healing forms of agriculture (biodynamic/homeopathic agriculture & the positive use of magnets, acoustic, and other vibrational energies), continue using vibrational energy healing systems, forgive ourselves and each other, and elevate our Collective Human Consciousness. One reason that we are going through these trials and tribulations, is that we have polluted our Collective

Consciousness with fear and all of its negative descendants rather than empowering our Collective Consciousness with love and peace. Let us remember that we are the Universal Creator having an experience as human beings.

You will find the aforementioned topics, and many others, discussed in the books contained on the resource pages that follow. [Please note that the authors of the resources have not endorsed me nor my book & I do not endorse all of the ideas and conclusions found in the resources.]

Regarding the editing of this book, I tried to keep my original intent as much as possible while making revisions. With some of the pieces the formatting has been altered from the original typed document (8.5 in x 11 in) to what is contained in this book (4.7 in x 6.2 in).

I used the following Free/Libre and Open Source Software (FLOSS) fonts (yes, fonts are software):

on the front cover: StayPuft, Musica, Ecolier\_court, FreeSans, Elegante, Linux Libertine Display O, and Liberation Sans;

on the back cover: Bitstream Vera Serif and Bitstream Vera Sans; and

on the spine: Dutismo, DejaVu Serif, Dynamic BRK, Fanwood, Free Schoolbook, and Linden Hill.

Most, if not all, of the aforementioned fonts can be found

at the Open Font Library (<http://www.openfontlibrary.org>) and/or in your favorite, free GNU/Linux distribution.

I used both Inkscape (<http://inkscape.org>) and the GIMP (GNU Image Manipulation Program) [<http://www.gimp.org>] for the creation of the front and back covers & the spine.

For the storage and editing of this book, I started out using OpenOffice.org Writer (now Apache OpenOffice) [<https://openoffice.apache.org>], but I moved to LibreOffice Writer (<http://www.libreoffice.org>) over the past couple of years.

I used Tellico (<http://tellico-project.org>) and OpenOffice.org/LibreOffice Writer for the storage of the print resources.

For the final design & layout of the book, I used Scribus (<http://www.scribus.net>).

All of the recent work has been performed on the fully free GNU/Linux based operating system called Trisquel (<http://trisquel.info>).

Although I am a supporter of Free/Libre and Open Source Software (FLOSS) and Free/Libre Hardware, I recognize the downsides of our mainstream state of (high) technology and thus offer these resources:

What Biotechnology, Genetic Engineering, Synthetic Biology, Cloning, Nanotechnology, High-Technology (High Tech), Conventional Renewable Energy Technologies (Solar, Geothermal, Wind, etc.), and Related Technologies are missing ([http://www.ecoccs.com/resources\\_links.html#missing](http://www.ecoccs.com/resources_links.html#missing))

Negative Effects of High-Technology (High Tech)  
[\[http://www.ecoccs.com/resources\\_links.html#hightech\]](http://www.ecoccs.com/resources_links.html#hightech)

ElectroMagnetism and Adverse Health Effects  
[\[http://www.ecoccs.com/resources\\_links.html#em\\_health\]](http://www.ecoccs.com/resources_links.html#em_health)

Below are some resources that can serve as an antidote to the galactic/global surveillance complex:

Global Police State/Surveillance  
[\[http://www.questionuniverse.com/rethink.html#surv\]](http://www.questionuniverse.com/rethink.html#surv)

Digital/Internet Freedom  
[\[http://www.ecoccs.com/resources\\_links.html#dig\\_free\]](http://www.ecoccs.com/resources_links.html#dig_free)

Break Out of Surveillance  
[\[http://www.ecoccs.com/resources\\_links.html#break\\_free\]](http://www.ecoccs.com/resources_links.html#break_free)

*Welcome to the Machine: Science, Surveillance, and the Culture of Control.* Derrick Jensen and George Draffan. ISBN# 978-1-931498-52-4

Thank you for joining me on this journey! Take care. Peace be unto you. ☺

# 6, 8, 12, 14 – 15, and 18 February 2014
