Genetic Engineering and Nanotechnology Questions

First off, I want to say that I fully support the Citizen Petition from Scientific Advisory Board on behalf of Children’s Health Defense to immediately halt the COVID-19 vaccination campaign. There have been far too many people that have been potentially adversely affected by this campaign.

I want to begin my Public Comment with some questions and resources related to the use of genetic engineering and nanotechnology in vaccines.

- 1) Do any of the Food & Drug Administration (FDA) Emergency Use Authorization (EUA) vaccinations contain genetically engineered components?
- 2) If so, then which ones do?
- 3) If so, then is this information provided to the general public as well as to the FDA? If it’s not being provided to both the general public and the FDA, then why not?
- 4) Do any of the United States Food & Drug Administration (FDA) Emergency Use Authorization (EUA) vaccinations contain nanotechnology, including, but not limited to, nanoparticles?
- 5) If so, then which ones do?
- 6) If so, then is this information provided to the general public as well as to the FDA? If it’s not being provided to both the general public and the FDA, then why not?

- 7) Are the genetically engineered mosquitoes that have been approved for release in Florida (and elsewhere?) been given the ability to inject the unsuspecting public with any COVID-19 vaccine(s)?
- 8) If so, then which vaccine(s)?
- 9) Does the FDA recommend any technique(s) so that people can remove the genetically-altered particles and/or nanotechnology from our bodies safely and effectively?
- 10) If not, then why not since the FDA has allowed this contamination to enter the EUA vaccines (and possibly previous vaccines)?
- 11) As it has been previously documented that genetic engineering is not completely safe, then why has the FDA allowed genetically engineered ingredients in vaccines?
- 12) As it has been previously documented that nanotechnology is not completely safe, then why has the FDA allowed nano ingredients in vaccines?

Questioning the “germ theory of disease causation”

This next section questions the “germ theory of disease causation” which is the foundation of vaccines. It is my opinion, through many years of research, that this theory has never been proven and that the founder of the theory, Louis Pasteur, was a known fraud during his lifetime.

The following questions were posed in a rapid response to a couple of articles from *The BMJ*; however, my response was not accepted. The full response, of which the following questions are an excerpt, can be found online at https://www.questionuniverse.com/BMJ_rapid-response_Not_Accepted.html.

- 13) Has anyone actually proved that “germs” cause disease thus confirming all of Robert Koch’s Postulates as well as Thomas M. River’s Postulates? Has this been reproduced?

- 14) Has anyone actually proved that the “SARS–CoV–2 virus” (“coronavirus”) causes the “dis–ease” named “COVID–19” thus confirming all of Robert Koch’s Postulates as well as Thomas M. River’s Postulates? Has this been reproduced? If not, then why not? And if not, then why has the world been so drastically changed?
- 15) Has any “health” authority in the world been successful at isolating the “SARS–CoV–2 virus” (“coronavirus”) from “patient–zero” in Wuhan, China? If not, then why not?
- 16) Has that isolated “virus” been used in the production of all of the “COVID–19” “dis–ease”–confirming tests? If not, then why not?
- 17) Was that isolated “virus” used in the production of the numerous “COVID–19” vaccines? If not, then why not? If not, then what genetic material, if any, is being used in the vaccines?
- 18) If “viruses” are not alive, then how are they attenuated? Do “viruses” actually exist or are they exosomes?
- 19) If “germs” don’t cause “dis–ease”, then through what process(es) do we become sick/ill?
- 20) How many people have been adversely affected, including dying, from the applications of the fraudulent “germ theory of disease causation” and its affiliates (antibiotics, antibacterials, vaccines/serums/inoculations/anti–toxins, etc.) over the past several centuries?

Proof of Isolation of the SAR-COV-2 virus Questions

The last section requests proof of the isolation of the SAR-COV-2 virus which is the basis for the FDA EUA and other government responses.

- 21) Has the Centers for Disease Control and Prevention (CDC), the National Institute of Health (NIH), and/or the FDA properly isolated the SARS-COV-2 virus directly from a sample taken from a COVID-19-diseased patient where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka vero cells, liver cancer cells, etc.)?

Please note that I am using “isolation” in the everyday sense of the word: the act of separating a thing(s) from everything else. I am not referring to the “isolation of SAR-COV-2” as it relates to:

- the culturing of something,
- the performance of an amplification test (i.e. a [RT-]PCR test), or
- the sequencing of something.

I am asking, if the Centers for Disease Control and Prevention (CDC), the National Institute of Health (NIH), and/or the FDA has properly isolated the SARS-COV-2 virus which was also present in “patient zero” in Wuhan, China?

If so, then how was this confirmation achieved? Does the CDC, NIH, and/or FDA have a sample of the isolated SARS-COV-2 virus from “patient zero” in Wuhan, China? If not, then what was used for this confirmation?

Essentially, I am trying to determine if Postulate 2 of Robert Koch’s Postulates has been satisfied. Below I am enclosing his 4 postulates:

- The germ must be found in all cases of the disease.

- The germ must be isolated from the host and grown in pure culture.
 - The purified germ must cause the disease again in another host.
 - The germ must then be isolated from the newly infected host.
- 22) Please provide the names of studies that indisputably show that SAR-COV-2 virus has been proven to exist (complete purification, isolation and definition of biochemical properties plus electron micrograph).
 - 23) Please provide the names of studies that indisputably show that the aforementioned virus causes a disease called COVID-19 (and also that other factors like malnutrition, toxins, etc. do not at least co-determine the course of disease). Please note that industrial poisons, various drugs (such as antipsychotics, opioid analgesics, anticholinergics, and/or antidepressants) may be a cause of respiratory diseases, such as pneumonia and thus also COVID-19.
 - 24) Please provide the names of at least two studies that indisputably show that vaccinations are completely safe and effective.
 - 25) If the CDC, NIH, and/or FDA can not fully satisfy Robert Koch's Postulates for the SAR-COV-2 virus, then does an emergency actually exist?
 - 26) If an emergency does not exist, then have employees and/or contractors of the CDC, NIH, and/or FDA committed scientific fraud using federal government funds?
 - 27) If an emergency does not exist, then why are vaccine passports needed?
 - 28) If an emergency does not exist, then why have vaccines been rushed through without going through the usual approval process for a new vaccine?
 - 29) If an emergency does not exist, then why are vaccines needed for every human being on this planet?
 - 30) If an emergency does not exist and since people have died from the EUA vaccines in the ongoing clinical trials, then who is liable for the deaths of those people? Also, who is liable for all of the people that have suffered other adverse reactions?

Proof of Isolation of the SAR-COV-2 virus Resources

I am enclosing the various resources that aided me in creating some of the questions in this section:
