

Date: 2021-09-29

Good afternoon Sam, I hope that you are doing well.

I want to thank you for your return response to my reply [https://www.questionuniverse.com/lrucka-Embry_ResearchGate-Removed-Postings_Response.pdf].

In order for me to fully understand the reasons for the removal of my postings, I would like for you to please address the following items in addition to the items in my previous reply:

- 1) Will you please provide the section(s) and subsection(s) of the Terms of Service [<https://www.researchgate.net/terms-of-service>] and the particular sentence(s) of the Community Guidelines [<https://www.researchgate.net/community-guidelines>] that I have allegedly violated with my 4 removed postings and/or comments?
- 2) According to the World Health Organization (WHO) and the United States Centers for Disease Control and Prevention (CDC), there is a global pandemic due to the infectious viral organism called the SARS-CoV-2 virus (coronavirus); however, on 2 November 2020, the CDC [<https://www.fluoridefreepeel.ca/wp-content/uploads/2020/11/USA-CDC-Virus-Isolation-Response-Scrubbed.pdf>] stated that “**A search of our records failed to reveal any documents pertaining to your request.**” in response to a FOIA request for records concerning the isolation of the same SARS-CoV-2 virus. If the US CDC does not have any records of isolating the SARS-CoV-2 virus (coronavirus), how did it determine that that virus is the cause of COVID-19? How did the CDC rule out other possibilities? Please remember from my original response that 110, as of now, global health/science institutions have failed to provide proof of the isolation and/or purification of the SARS-CoV-2 virus (coronavirus) [<https://www.fluoridefreepeel.ca/68-health-science-institutions-globally-all-failed-to-cite-even-1-record-of-sars-cov-2-purification-by-anyone-anywhere-ever/>]. Thus, how has any health/science institution scientifically determined that the single cause of COVID-19 is the SARS-CoV-2 virus (coronavirus)?
- 3) Has the WHO and/or the CDC successfully confirmed all of Friedrich Gustav Jacob Henle-Robert Koch’s Postulates as well as Thomas M. River’s Postulates to determine that the only possible explanation for the symptoms that people are experiencing and dying from is the SARS-CoV-2 virus (coronavirus)? How did the WHO and the CDC rule out the similarities between microwave radiation sickness/EM-RFR exposure and the symptoms associated with COVID-19? Please refer to the compendium of documentation provided by Dr. Zory Glaser [<https://zoryglaser.com/>] on the “effects of electromagnetic and radio frequency radiation”.
- 4) How were the COVID-19 prevention strategies properly scientifically validated since there is not a known purified isolate of the SARS-CoV-2 virus (coronavirus) to test the strategies against?
- 5) The definition of *experiment* from Dictionary.com [<https://www.dictionary.com/browse/experiment>]: *a test, trial, or tentative procedure; an act or operation for the purpose of discovering something unknown or of testing a principle, supposition, etc.* From this definition, we, the global Human population, are within a complex experiment: a) the rise of 5G/6G; b) the increase in geoengineering activities; c) social distancing/disconnection; d) face coverings/masks; e) global experimental vaccination campaigns with genetically engineered and/or nanotechnology components; f) personal freedom curtailment; g) the psychological trauma of being told to fear an unconfirmed deadly virus and each other for fear of catching and/or spreading this unproven deadly virus; h) the socio-economic-psychological impacts of directives of the WHO (and thus our national and/or local governmental organizations) & the “Great Reset” of the World Economic Forum (WEF), etc. directed by the World Health Organization, the WEF, and/or other global/national organizations and individuals. This then begs the question, since the WHO is a global medical organization, does the Nuremberg Code [<https://www.marshall.edu/ori/nuremberg-code-directives-for-human-experimentation/>] and/or the World Medical Association (WMA) Declaration of Helsinki [<https://www.wma.net/policies-post/wma-declaration-of-helsinki-ethical-principles-for-medical-research-involving-human-subjects/>] apply to the directives of the WHO? Does it also apply to the directives of national and/or local medical organizations? I ask these questions because both the Nuremberg Code and the Declaration of Helsinki have a statement about **Informed Consent**. I feel that the information that I have posted helps people to have a greater & deeper understanding of some aspects of this global experiment. In my opinion, in order to have full informed consent, we must have a wide array of information so that we can make better decisions for ourselves.

- 6) Please provide the records of studies {i.e. title, author(s), date, journal name, where the public may access it} that prove that: a) nanoscopic particles will not enter the pores of a face covering and/or face mask; b) nanoscopic particles can not enter orifices of the skin; and c) face covering and/or face mask mandates have effectively stopped the symptoms associated with COVID-19 and/or other respiratory infectious diseases.

By Steve Anderson, PhD, MPP. Also archived at <https://archive.vn/7t37W>

I want to thank you in advance for your time and consideration.

Irucka Embry, E.I.T.

No fear, Only Love!

–Irucka Ajani Embry, 15 March 2020

“With the increased use of therapeutic serums in the past twenty years, much has been written of the various manifestations of anaphylaxis. Urticaria, arthralgia, adenopathy and cardiac collapse are well known complications of serum therapy. Coma and occasionally death have been reported following serum injection. Many reports of multiple neuritis and myelitis following the use of Pasteur treatment have appeared, and encephalitis following vaccination is well known. Another unpleasant complication of prophylactic efforts, and fortunately one less frequently seen, is multiple neuritis.”

–George Wilson, M.D. and Samuel B. Hadden, M.D., *Neuritis and Multiple Neuritis Following Serum Therapy*, *JAMA*. 1932;98(2):123-125, January 9, 1932, <https://jamanetwork.com/journals/jama/article-abstract/1153665>. Also archived at <https://archive.vn/Nw4nq>

“If virulent germs were normal in the atmosphere, how numerous would be the occasions for their penetration independently by way of the lungs and intestinal mucus! There would not be a wound, however slight, the prick even of a pin, that would not be the occasion for infecting us with smallpox, typhus, syphilis, gonorrhoea.”

–Professor Béchamp, as quoted in *Béchamp or Pasteur?: A Lost Chapter in the History of Biology* By Ethel D. Hume on page 308 [prefaced by *Pasteur: Plagiarist, Imposter: The Germ Theory Exploded* By R. B. Pearson], ISBN# 978-1-46790-012-6, 2011

“The general public, however intelligent, are struck only by that which it takes little trouble to understand. They have been told that the interior of the body is something more or less like the contents of a vessel filled with wine, and that this interior is not injured — that we do not become ill, except when germs, originally created morbid, penetrate into it from without, and then become microbes.

“The public do not know whether this is true; they do not even know what a microbe is, but they take it on the word of the master; they believe it because it is simple and easy to understand; they believe and they repeat that the microbe makes us ill without inquiring further, because they have not the leisure — nor, perhaps, the capacity — to probe to the depths that which they are asked to believe.”

–Professor Béchamp, preface to *La Théorie du Microzyma*, as quoted in *Béchamp or Pasteur?: A Lost Chapter in the History of Biology* By Ethel D. Hume on page 304 [prefaced by *Pasteur: Plagiarist, Imposter: The Germ Theory Exploded* By R. B. Pearson], ISBN# 978-1-46790-012-6, 2011

“There is an implication to be found in the statement of Surgeon Verneuil, though probably not meant by him, to which assent must be given when understood. It is TRUE that there is no such THING as tetanus, small pox, syphilis, etc., as is implied by the general use of nosological terms. Disease is not a thing, an entity: it is a condition, and the error of regarding the condition of disease as an entity has confirmed, where it has not originated, much of the prevailing erroneous treatment of the sick.

“Nosological terms have a use; it is that of bringing to the mind of the physician a group of pathological symptoms, which may or may not be present in the case of the patient under consideration; from them, *when present*, the diseased condition of the patient can be recognized and treated. Unfortunately, through not understanding this truth, attempts are frequently made to treat, *not the patient*, but the name, which has been given to a collection of morbid symptoms.

“A broken limb is a thing; the inflammation which results from it is a condition, and if gangrene ensues the *gangrene* is not a *thing*, but a condition to be taken into consideration with all the other symptoms in the treatment of the patient. The surgeon, Verneuil, had probably a glimmering perception of this truth, but he misapplied it, for his theory and practice, as a physician, and the theory and practice of nearly all modern medicine assume that the condition to be treated is a thing having a name and this name is treated instead of the patient.”

–Montague R. Levenson, *The Blood and its Third Anatomical Element* (http://www.whale.to/v/bechamp_b1.html) by Antoine Bechamp, 1912, Translated by Montague R. Levenson, [WHALE Oct 2005]
