

# Germs Can Not & Do Not Cause Disease: The “germ theory of disease causation” is a Fraud

Irucka Embry

2021-09-15

## Document Information

Return to Questioning the Universe Publishing (QUP) {Irucka Embry}: Resources to help us rethink the current crisis (in perception) [[https://www.questionuniverse.com/rethink\\_current\\_crisis.html](https://www.questionuniverse.com/rethink_current_crisis.html)]

What You Are Not Being Told (This is Just the “Tip of the Iceberg”)

## Introduction

I have created this brief document to provide some resources that will hopefully allow people to see the greater agenda that is (and has been) afoot for quite some time now. As the title suggests, the information here is only the “tip of the iceberg”. There is a whole lot more that is going on in the shadows.

This information is not fully discussed (or discussed at all) by the “corporament”.

In the USA, the “corporament” exists as the:

military (defense/offense) + industrial + academic (schooling — at all levels — as prison) + “corporament” entertainment (Hollywood, media, advertising/consumerism/commercialization, propaganda/psychological warfare) + judicial (defense and prosecutorial lawyers, judges, law enforcement/police, prisons) + financial (banks, accounting firms) + religion + petrochemical/pharmaceutical (drugs, antibiotics, antibacterials, vaccines, pesticides — toxins to kill or put you at “dis-ease” and drugs to “treat” you) + imperial commu-soci-capitofasdemorepubcracism system/society/economy/Western thinking = Military-industrial-academic-“corporament” entertainment-judicial-financial-religious-petrochemical/pharmaceutical complex.

Commu-soci-capitofasdemorepubcracism is derived from communism, socialism, capitalism, fascism, democracy, and republic as these concepts all have the same root. The complex was originally defined in the aforementioned article [[https://www.utdailybeacon.com/opinion/our-government-can-not-be-trusted/article\\_81932d59-0861-5647-87b2-901d4d5cabd8.html](https://www.utdailybeacon.com/opinion/our-government-can-not-be-trusted/article_81932d59-0861-5647-87b2-901d4d5cabd8.html) | Our government can not be trusted by Irucka Ajani Embry, Monday, 26 August 2002, *The Daily Beacon*. Also, the article can be found by searching at <https://www.questionuniverse.com/oldway/columns.html>.], but it has been recently revised to reflect a new understanding of the complex’s nature.

—Irucka Ajani Embry, piece entitled: “Attack of the ...”, page 103-104, from *Balancing the Rift: ReCONNECTualizing the Pasenture*, ISBN-13: 978-0-9914994-0-3 / ISBN-10: 0-9914994-0-9

Also, I am enclosing resources that will enable us, globally, to unite together as human beings, the human race, and regain our freedom & power from the global *e*lites that think that they control us because we have allowed them to develop that false conclusion.

It's past time for the Human Race To Get Off Our Knees [see *Human Race Get Off Your Knees: The Lion Sleeps No More* By David Icke – <https://shop.davidicke.com>]

We are All Infinite Consciousness having an Experience as ... [see *Remember Who You Are: Remember 'Where' You Are and Where You 'Come' from: Remember ...* By David Icke – <https://shop.davidicke.com>]

Thank you.

## Immunity: Does It Actually Exist?

Béchamp, Antoine, *The Blood and its Third Element* [1912]

Immune System Cartoon by Antoine Béchamp ([http://whale.to/v/bechamp\\_b1.html](http://whale.to/v/bechamp_b1.html), *The Blood and its Third Anatomical Element*  
By Antoine Béchamp, 1912, Translated by Montague R. Levenson, [WHALE Oct 2005])

## Questioning the “Germs” Cause “Dis-ease” Paradigm

- 1) If the natural role of germs (evolved microzymas due to the ambient conditions in our internal environment) in our bodies is to carry away waste products, dead cells, etc., then why are we surprised to see germs in our body doing those functions? Is it that we have failed to realize that the presence of germs does not mean the presence of “dis-ease”? Please remember that “correlation does not equal causation”. Also, is it that we do not realize that we are germs?
- 2) If you believe in the fraudulent “germ theory of disease causation”, then why haven’t all of the germs collectively defeated their enemy (Human Beings & every other Life form on this planet)? Why is that we have co-existed for billions of years?
- 3) Why don’t germs always attack their prey (host), i.e., why are we not always sick from an “infection” caused by “germs”?
- 4) In a single dwelling, how is it that not everyone living together in close-quarters gets sick at the same time or for the same length of time? Furthermore, why isn’t everyone’s complete symptoms the exact same?
- 5) Is it possible that people have similar symptoms (“an outbreak”) because they are sharing a “resonance pattern” within our Collective Human Consciousness? We already know that our Collective Human Consciousness Field can affect “physical” phenomena as happened on 11 September 2001 with the RNGs (random number generators). Could it be the same for the “physical” manifestation of symptoms too? <sup>1, 2</sup>
- 6) Has anyone actually proved that “germs” cause disease thus confirming all of Friedrich Gustav Jacob Henle-Robert Koch’s Postulates as well as Thomas M. River’s Postulates? Has this been reproduced? <sup>3</sup>
- 7) Has anyone actually proved that the “SARS-CoV-2 virus” (“coronavirus”) causes the “dis-ease” named “COVID-19” thus confirming all of Friedrich Gustav Jacob Henle-Robert Koch’s Postulates as well as Thomas M. River’s Postulates? Has this been reproduced? If not, then why not? And if not, then why has the world been so drastically changed? <sup>4</sup>
- 8) Has any “health” authority in the world been successful at isolating the “SARS-CoV-2 virus” (“coronavirus”) from “patient-zero” in Wuhan, China? If not, then why not? <sup>5</sup>
- 9) Has any “health” authority in the world been successful at isolating the so-called “delta variant” “SARS-CoV-2 virus” (“coronavirus”) from “patient-zero”? If not, then why not?
- 10) Has any “health” authority in the world been successful at isolating the so-called “lambda variant” “SARS-CoV-2 virus” (“coronavirus”) from “patient-zero”? If not, then why not?
- 11) If the SARS-CoV-2 “virus” has yet to be properly isolated, how can a “delta variant” of a non-existent “virus” be properly isolated, purified, and identified to be the cause of new dis-eases more than likely caused, in part, by the global, mass vaccination campaign\$?
- 12) If the SARS-CoV-2 “virus” has yet to be properly isolated, how can a “lambda variant” of a non-existent “virus” be properly isolated, purified, and identified to be the cause of new dis-eases more than likely caused, in part, by the global, mass vaccination campaign\$?

3. [https://www.questionuniverse.com/BMJ\\_rapid-response\\_Not\\_Accepted.html](https://www.questionuniverse.com/BMJ_rapid-response_Not_Accepted.html) | Questioning the “germ theory of disease causation” (Letter to Editor Not Accepted by The BMJ) By Irucka Embry

4. [https://www.questionuniverse.com/BMJ\\_rapid-response\\_Not\\_Accepted.html](https://www.questionuniverse.com/BMJ_rapid-response_Not_Accepted.html) | Questioning the “germ theory of disease causation” (Letter to Editor Not Accepted by The BMJ) By Irucka Embry

5. [https://www.questionuniverse.com/BMJ\\_rapid-response\\_Not\\_Accepted.html](https://www.questionuniverse.com/BMJ_rapid-response_Not_Accepted.html) – Questioning the “germ theory of disease causation” (Letter to Editor Not Accepted by The BMJ) By Irucka Embry

- 13) How is it that 6 feet (1.83 m) of personal distance will prevent a possible “infection” from a “virus” that somehow started in Wuhan, China, and has basically travelled to most countries of Planet Earth in a matter of mere months?
- 14) How is it that this “virus” can navigate the world, but can’t go above, under, around, and/or through the pores of a plexiglass and/or plastic “barrier”?
- 15) Has anyone applied all aspects of the Scientific Method to prove that the “germ theory of disease causation” is indeed valid? Has this been reproduced successfully? <sup>6</sup>
- 16) Does a cough, snuffle, sneeze, sore throat, etc. mean that you have been “infected” by an external germ? Or does it mean that your body is attempting to bring itself back into homeostasis?
- 17) If you believe in the fraudulent “germ theory of disease causation”, then how is that a homeopathic remedy and/or a homeopathic cell salt can cure a “dis-ease” [remove the collection of symptom(s) that we falsely call “dis-ease” names] like “pneumonia”, “cold”, “influenza (flu)”, etc.?
- 18) Is there really an “immune” system? Is there really “immunity”? Is there really “herd immunity”? If not, then why are these lies repeated?
- 19) In the United States of America, has any attorney filed a Qui Tam against the NIH, CDC, FDA, NIAID, etc. for science fraud under the Data Quality Act (DQA)? Like Dr. Judy Wood did against the NIST’s NCSTAR contractors concerning their fraudulent continuum of violence 11 September 2001 report. <sup>7</sup>
- 20) If you believe in the fraudulent “germ theory of disease causation”, then how do you account for pleomorphism? [Please see the references towards the end of this document.]
- 21) Why would you give an antiSelf poison (Antibacterial/Antibiotic/Antimicrobial/Antiviral) in order to remove a dis-ease? Is it that we do not know that that will create a new “dis-ease” to be treated?
- 22) If you believe in the fraudulent “germ theory of disease causation”, then have you ruled out all other possibilities for any “dis-ease” that you or anyone that you know have had, including, but not limited to, the following:
  - your toxic emotions/thoughts;
  - poor posture;
  - poor breathing;
  - lack of adequate exercise for you;
  - lack of adequate rest for you;
  - lack of adequate exposure to Sunlight for you;
  - wearing of a face shield, face mask, etc.;
  - dehydration;
  - constipation;
  - diarrhea;
  - negative stress;
  - nutritional lack (malnourishment, malnutrition, poor absorption, etc.);

---

By Alina Bradford, August 04, 2017

7. <https://www.drjudywood.com/wp/court-case-qui-tam/> | Dr Judy Wood: Court Case (Qui Tam); <https://www.questionuniverse.com/oldway/continuum.html> | The cycles of life, some must be broken and some must be kept going...: Continuum of Violence By Irucka Embry

- hunger/starvation;
- environmental changes (humidity, precipitation, temperature, etc.);
- body interfering electromagnetic fields/radiation (EMF/EMR) themselves and/or their interference of water distribution systems, etc.;
- toxic chemical substances (biological, chemical, and/or radiological) in the air, land, and/or water;
- medical racket products and/or devices (including, but not limited to, prescription and/or over-the-counter drugs; CT scans; mammograms; ultrasounds; antiSelf – Antibacterials/Antibiotics/Antimicrobials/Antivirals, Disinfectants, Hand Sanitizers, (Bio)Pesticides, Vaccination\$, etc.]<sup>8</sup>
- use of alcohol and/or non-prescription/non-over-the-counter drugs;
- synergistic effects of chemical mixtures and/or EMF/EMR;
- mind control/psychological warfare/mass psychosis/applied behavioural psychology/perception programming;<sup>9, 10</sup>
- human experimentation;
- torture;
- various conventional, nuclear, and/or exotic weapons (including, but not limited to electronic weapons; geoengineering; HAARP and/or related technologies; directed-energy weapons; 5G; “electronic, psychotronic, or information weapons; chemtrails; high altitude ultra low frequency weapons systems; plasma, electromagnetic, sonic, or ultrasonic weapons; laser weapons systems; strategic, theater, tactical, or extraterrestrial weapons; chemical, biological, environmental, climate, or tectonic weapons”; etc.)? If not, then why not? Why was an invisible to the naked eye micro-organism your first choice to blame?<sup>11, 12</sup>

23) Why have we, as Human Beings, been so easily programmed with this version of “dis-ease” progression?

24) The items in question 22 all lead to an alkaline-acidity imbalance in our bodies and thus the body must work to re-balance the whole system.<sup>13</sup>

25) Why don't we ask these & other questions about the fraudulent "germ theory of disease causation"?

## Useful Quotes

"There is an implication to be found in the statement of Surgeon Verneuil, though probably not meant by him, to which assent must be given when understood. It is TRUE that there is no such THING as tetanus, small pox, syphilis, etc., as is implied by the general use of nosological terms. Disease is not a thing, an entity: it is a condition, and the error of regarding the condition of disease as an entity has confirmed, where it has not originated, much of the prevailing erroneous treatment of the sick.

Nosological terms have a use; it is that of bringing to the mind of the physician a group of pathological symptoms, which may or may not be present in the case of the patient under consideration; from them, *when present*, the diseased condition of the patient can be recognized and treated. Unfortunately, through not understanding this truth, attempts are frequently made to treat, *not the patient*, but the name, which has been given to a collection of morbid symptoms.

A broken limb is a thing; the inflammation which results from it is a condition, and if gangrene ensues the *gangrene* is not a *thing*, but a condition to be taken into consideration with all the other symptoms in the treatment of the patient. The surgeon, Verneuil, had probably a glimmering perception of this truth, but he misapplied it, for his theory and practice, as a physician, and the theory and practice of nearly all modern medicine assume that the condition to be treated is a thing having a name and this name is treated instead of the patient."

-Montague R. Levenson, *The Blood and its Third Anatomical Element* by Antoine Béchamp, 1912, Translated by Montague R. Levenson, [WHALE Oct 2005]

"Corona virus — COVID-19, which is an acronym that stands for, "Certificate Of Vaccination Identification (C.O.V.I.D.) — Artificial Intelligence (1 represents the first letter in the alphabet = A and 9 represents the ninth letter in the alphabet = I)." "

-Robert O. Young, CPT, MS, D.SC., Ph.D., Posted on 04/23/2020, pHowever Young Blog: The Corona Virus is Just a Concept That Only Exists on Paper [<https://phoreveryoung.wordpress.com/2020/04/23/the-corona-virus-is-just-a-concept-that-only-exists-on-paper/>]

"The analytical sensitivity of the rRT-PCR assays contained in the CDC 2019 Novel Coronavirus (2019- nCoV) Real-Time RT-PCR Diagnostic Panel were determined in Limit of Detection studies. **Since no quantified virus isolates of the 2019-nCoV were available for CDC use at the time the test was developed and this study conducted** [my emphasis], assays designed for detection of the 2019-nCoV RNA were tested with characterized stocks of in vitro transcribed full length RNA (N gene; GenBank accession: MN908947.2) of known titer (RNA copies/ $\mu$ L) spiked into a diluent consisting of a suspension of human A549 cells and viral transport medium (VTM) to mimic clinical specimen. Samples were extracted using the QIAGEN EZ1 Advanced XL instrument and EZ1 DSP Virus Kit (Cat# 62724) and manually with the QIAGEN DSP Viral RNA Mini Kit (Cat# 61904). Real-Time RT-PCR assays were performed using the Thermo Fisher Scientific TaqPath™ 1-Step RT-qPCR Master Mix, CG (Cat# A15299) on the Applied Biosystems™ 7500 Fast Dx Real- Time PCR Instrument according to the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel instructions for use."

-U. S. Food and Drug Administration: CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel: For Emergency Use Only: Catalog # 2019-nCoV EUA-01, <https://www.fda.gov/media/134922/download>. Also archived at <https://archive.vn/qn0XV>

“Here is one example of how the trick may play out. A toxin creates a disease. The toxin might be pesticides or industrial pollution or wireless technology radiation. The toxin damages millions of people and their communities. Companies or their insurance provider may be liable for civil or criminal violations. Then a virus is blamed. A “cure” is found in a “vaccine.” The pesticide or other toxic exposure is halted just as the vaccine is introduced, and presto, the sickness goes away. The vaccine is declared a success, and the inventor is declared a hero. A potential financial catastrophe has been converted to a profit, including for investors and pension funds. As a portfolio strategist, I admit it has been a brilliant trick and likely has protected the insurance industry from the bankrupting losses it would experience if it had to fairly compensate the people and families destroyed.”

-Catherine Austin Fitts, May 27, 2020, Solari Report: The Injection Fraud — It’s Not a Vaccine [<https://home.solari.com/deep-state-tactics-101-the-covid-injection-fraud-its-not-a-vaccine/>]

“What is a germ? It is you. Not the Real You, but the you that is having an experience as \_\_\_\_\_.”

That idea stems from 2 sources. 1) There used to be a T-shirt in the The Bigelsen Method (<https://thebigelsenmethod.com/>) store that had on the front side: “Germs R Us” and on the back side: “The terrain is everything”. 2) The various books written by David Icke (<https://shop.davidicke.com>) that expose the “Matrix” and help us know who we Really Are.

-Irucka Ajani Embry, 17 June 2020, [Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License](https://creativecommons.org/licenses/by-nc-sa/4.0/)

“I finally had the opportunity to ask Dr. Montagnier about the reference when he lectured in San Diego at the grand opening of the U.C.S.D. AIDS Research Center, which is still run by Bob Gallo’s former consort, Dr. Flossie Wong-Staal. This would be the last time I would ask my question without showing anger. In response Dr. Montagnier suggested, “Why don’t you reference the C.D.C. report?”

““I read it,” I said. “That doesn’t really address the issue of whether or not H.I.V. is the probable cause of AIDS, does it?”

“He agreed with me. It was damned irritating. If Montagnier didn’t know the answer, who the hell did?”

“One night I was driving from Berkeley to La Jolla and I heard an interview on National Public Radio with Peter Duesberg, a prominent virologist at Berkeley. I finally understood why I was having so much trouble finding the references that linked H.I.V. to AIDS. There weren’t any, Duesberg said. No one had ever proved that H.I.V. causes AIDS. The interview lasted about an hour. I pulled over so as not to miss any of it.”

-Kary Mullis, *The Medical Establishment vs. The Truth* Book Excerpt, *Penthouse* Sept. 1998, <https://virusmyth.com/aids/hiv/kmdancing.htm>

“Obsessed with the invisible microbe, virus, protozoa as all important excitants of disease, subservient to laboratory methods of diagnosis, hidebound by our system of nomenclature, we often forget the most fundamental of all rules for the physician, that the right kind of food (nutrition) is the most important single factor in the promotion of health and the wrong kind of food the most important single factor in the promotion of disease.”

-McCarrison, 1936, as quoted in *Second Thoughts on Disease: A Controversy and Béchamp Revisited* By Drs Kalokerinos & Dettman [<http://whale.to/w/kal.html>]

“ABOUT BIOWEAPONS: ...“Biolabs are acid labs. There are NO bioweapons. Germs are born in us and from us. Viruses are acidic waste from cellular breakdown or fermentation. Antibiotics have been the result. Which are nothing more or less than the acidic waste of fermentation. In other words, you take a yeast-like penicillium and ferment sugar and you end up with the so-called antibiotic which is the acid waste from fermentation. It is morbid thinking to believe you can cure disease with disease.” ”

-Dr. Robert O. Young [Dr. Judy Mikovits and Dr. Robert Young — re COVID, Vaccines, Viruses, FACE MASKS AND MORE! By Robert O. Young, CPT, MS, D.SC., Ph.D., 08/30/2020, <https://phoreveryoung.wordpress.com/2020/08/30/dr-judy-mikovits-and-dr-robert-young-re-covid-vaccines-viruses-face-masks-and-more/>]

### “The Microbes of Plague, Cholera, Tetanus, etc.

“The Times of January 13th, 1896, quotes a Report to the Plague Commission at Agra, by Mr. Hankin, Bacteriologist for the North-West Provinces.”There was no doubt that cases of Plague occurred among human beings in which no microbes were visible at the time of death. This fact was first proved by the members of the German and Austrian Plague Commission.”

“The”Comma bacillus” was discovered by Koch, who proclaimed it to be the cause of Asiatic Cholera. Dr. Klein, who was about to proceed to India to investigate the origin of that disease, did not believe in Professor Koch’s statement and experimentally drank a wineglassful comma bacilli in “pure culture.” No effect followed; and Dr. Klein remains alive and well to this day. At Hamburg Pettenkofer and Emmerich swallowed the actual dejecta of a cholera patient with result similarly negative. Pettenkofer concluded that “the specific virus of cholera does not arise from the comma bacillus, but is evolved in the human organism.””

-The Germ Theory of Disease By Herbert Snow, M.D., *The Journal of Osteopathy*, April 1913, Vol. 20, No. 4, page 214

### “The Germ Theory Fetish

“Now, the forcing of these inoculations upon individuals by law is one of the worst of tyrannies imaginable, and should be resisted, even to the death of the official who is enforcing it. English-speaking peoples need to have their ideals of liberty refreshed by a study of the history of Wat Tyler, who headed one of the most justifiable rebellions in history, and although treacherously murdered by the then Lord Mayor of London, his example should be held up to all our children for imitation.

“I confess, ladies and gentlemen, when I see the constantly encroaching power of physicians in this country and in the United States, I view with some alarm some of the provisions of that nobly-intended measure, the Insurance Bill, now pending in the Parliament of this country, whereby so many of the Insurance benefits are made dependent upon obedience to the orders of a physician. Nor am I unmindful of the fact that were only justice done to the people with regard to the land, in the manner so admirably pointed out by the “prophet of San Francisco,” all the elaborate machinery of the Insurance Bill could be dispensed with, for it is not charity that the people need—only justice!

“But, *revenons a nos moutons*. The entire fabric of the germ theory of disease rests upon assumptions which not only have not been proved, but which are incapable of proof, and many of them can be proved to be the reverse of truth. The basic one of these unproven assumptions, the credit for which in its present form is wholly due to M. Pasteur, is the hypothesis that all the so-called infectious and contagious disorders are caused by germs, each disease having its own specific germ, which germs have existed in the air from the beginning of things, and that though the body is closed to these pathogenic germs when in good health, when the vitality is lowered the body

becomes susceptible to their inroads. My mind is so constituted that it can perceive in the assumption of this, as a fact, only an instance of such incredible folly that it really matches the fetish of those whom we regard as savages, and serves to show how little the human intellect has progressed from the mental state of the savage.”

–*Pasteur the Plagiarist: The Debt of Science to Béchamp* by Dr. Montague R. Levenson, 1911. Delivered at Claridges Hotel, London, England on May 25, 1911, pages 11-13, [https://babel.hathitrust.org/cgi/pt?id=mdp.39015081399316&view=1up&seq=](https://babel.hathitrust.org/cgi/pt?id=mdp.39015081399316&view=1up&seq=1)

1

“He who considers disease results to be the disease itself, and expects to do away with these as disease, is insane. It is an insanity in medicine, an insanity that has grown out of the milder forms of mental disorder in science, crazy whims. The bacteria are results of disease. In the course of time we will be able to show perfectly that the microscopical little fellows are not the disease cause, but that they come after, that they are scavengers accompanying the disease, and that they are perfectly harmless in every respect. They are the outcome of the disease, are present wherever the disease is, and by the microscope it has been discovered that every pathological result has its corresponding bacteria. The Old School consider these the cause, but we will be able to show that disease cause is much more subtle than anything that can be shown by a microscope. We will be able to show you by a process of reasoning, step by step, the folly of hunting for disease cause by the implements of the senses.”

–James Tyler Kent, A.M., M.D., *The Art and Science of Homeopathic Medicine*, Mineola, NY: Dover Publications, Inc., Page 22, 2002. [Originally published as *Lectures on Homœopathic Philosophy* in 1900.]

“... But these assertions (of Surgeon Verneuil) are reduced to nothing, when we call to mind that the pretended germs of the air are only the microzymas of organisms which have disappeared, which had become bacteria by evolution; that even at the Academy of Medicine I said—and no one ventured to contradict me—that no one had ever been able to reproduce a disease on the nosological roll by taking the pretended pathogenic microbe in normal air, but only in the diseased animal. And I add, that just as with time the fibrinous microzymas lose the property of decomposing oxygenated water so, as proved long ago by Davaine, after a short time the blood of an animal which had died of anthrax [sang de rate] no longer communicated that diseased condition; and the same is true in all cases.

THUS NORMAL AIR NOT ONLY DOES NOT, BUT CANNOT, CONTAIN THE PRETENDED PATHOGENIC MICROBES, AND THE VERY PRINCIPLE OF MICROBIAN MEDICINE CONSTITUTES A FUNDAMENTAL ERROR.”

–Antoine Béchamp, *The Blood and its Third Anatomical Element* by Antoine Béchamp, 1912, Translated by Montague R. Levenson, [WHALE Oct 2005]

“In man the provocative cause of microbial disease may be a disturbance in any of the factors of his external or internal environment—be it weather conditions, availability of food, working habits, economic status, or emotional stress.

“Pasteur had clearly visualized these complexities and had pointed out explicitly in his writings that the response of the infected individual was determined by his hereditary environment, his state of nutrition, his environment including the climate, and even his mental state. In the course of studies on the disease of silkworms known as flacherie Pasteur came to the conclusion, startling for the time, that the microorganisms present in such large numbers in the intestinal tract of the sick worms were ‘more an effect than a cause of the disease.’ These words were echoed a half century later by G. B. Shaw’s facetious remark in the preface to *The Doctor’s Dilemma*: ‘The characteristic microbe of a disease might be a symptom instead of a cause.’”

–René Dubos, *Mirage of Health: Utopias, Progress, and Biological Change*, pages 93-94, ISBN 978-0-8135-1260-0 / 0-8135-1260-3

“If virulent germs were normal in the atmosphere, how numerous would be the occasions for their penetration independently by way of the lungs and intestinal mucus! There would not be a wound, however slight, the prick even of a pin, that would not be the occasion for infecting us with smallpox, typhus, syphilis, gonorrhoea.”

–Professor Béchamp, as quoted in *Béchamp or Pasteur?: A Lost Chapter in the History of Biology* By Ethel D. Hume on page 308 [prefaced by *Pasteur: Plagiarist, Imposter: The Germ Theory Exploded* By R. B. Pearson], ISBN# 978-1-46790-012-6, 2011

“The general public, however intelligent, are struck only by that which it takes little trouble to understand. They have been told that the interior of the body is something more or less like the contents of a vessel filled with wine, and that this interior is not injured — that we do not become ill, except when germs, originally created morbid, penetrate into it from without, and then become microbes.

“The public do not know whether this is true; they do not even know what a microbe is, but they take it on the word of the master; they believe it because it is simple and easy to understand; they believe and they repeat that the microbe makes us ill without inquiring further, because they have not the leisure — nor, perhaps, the capacity — to probe to the depths that which they are asked to believe.”

–Professor Béchamp, preface to *La Théorie du Microzyma*, as quoted in *Béchamp or Pasteur?: A Lost Chapter in the History of Biology* By Ethel D. Hume on page 304 [prefaced by *Pasteur: Plagiarist, Imposter: The Germ Theory Exploded* By R. B. Pearson], ISBN# 978-1-46790-012-6, 2011

“In typhoid fever, in gangrene, and in anthrax, the existence has been proved of bacteria in the tissues and in the blood, and one was very much disposed to take them for granted as cases of ordinary parasitism. It is evident, after what we have said, that instead of maintaining that the affection has had as its origin and cause the introduction into the organism of foreign germs with their consequent action, one should affirm that one is dealing here with an alteration of the functions of microzymas, an alteration indicated by the change that has taken place in their form.”

–Professor Béchamp, *Comptes Rendus* 75, p. 1525, 1869, as quoted in *Béchamp or Pasteur?: A Lost Chapter in the History of Biology* By Ethel D. Hume on page 219 [prefaced by *Pasteur: Plagiarist, Imposter: The Germ Theory Exploded* By R. B. Pearson], ISBN# 978-1-46790-012-6, 2011

“The cellularists, it is but fair to recall, regarding the cellule as the simplest anatomical element, believed it proceeded necessarily from a former cellule, *omnis cellula e cellula*, holding it to be the *vital unit*, living *per se*, and regarded an entire organism as the sum of these units. But we now know that that was a deduction from incomplete and superficial observations, for the cellule, a transitory anatomical element, has the microzyma for its anatomical element. It is this which alone possesses all the characters of an anatomical element, *living per se*, and which must be regarded as the unit of life. It is what I have already stated in the following terms:

““*The microzyma is at the beginning and at the end of every living organization. It is the fundamental anatomical element whereby the cellules, the tissues, the organs, the whole, of an organism are constituted living.*”

“Let us devote a few words to develop this idea. Let us penetrate a little further into this notion of a fundamental anatomical element, which, as has been said, implies that the microzyma is the living atom of the organization as the physical atom is the element of the molecule of a simple body. This would be true if the microzyma were unchangeable in its simplicity. But in reality it is essentially mutable, as are all living bodies; and it is especially so, in

order that it may fulfil its numerous functions. In fact, the microzymas, functionally different in the different anatomical systems of the same species, and different at all ages, beginning with the embryonal stage, have been primitively those of the vitellus, after having been those of the ovule. A microzymba then is not, properly speaking, an atom; but always anatomically simple, it becomes, by nutrition, that which it needs to become, so as to accommodate itself to each new condition of existence which the successive phases of the development of each anatomical system provide for it. It is thus that even in the embryo, in that which will be the ovary, a category of microzymas becomes again ovular microzymas to recommence the same cycle. I add that, taken as a whole and in its details, the THEORY HAS BEEN CONFIRMED, VERIFIED, CORROBORATED by a great number of other facts of general anatomy and of pathological anatomy and of physiology.”

–Antoine Béchamp, *The Blood and its Third Anatomical Element* by Antoine Béchamp, 1912, Translated by Montague R. Lever-son, [WHALE Oct 2005]

“My researches upon fermentations and ferments, particularly upon molecular granulations, date back some fifteen years, and those which Professor Estor and I conducted for the purpose of generalizing my earlier observations have led to this result: that the animal is reducible to the microzymba. But the microzymba, whatever its origin, is a ferment; it is organized, it is living, capable of multiplying, of becoming diseased and of communicating disease.

“All microzymas are ferments of the same order – that is to say, they are organisms, able to produce alcohol, acetic acid, lactic acid and butyric acid.

“In a state of health the microzymas of the organism act harmoniously, and our life is, in every meaning of the word, a regular fermentation. In a state of disease, the microzymas do not act harmoniously, and the fermentation is disturbed; the microzymas have either changed their function or are placed in an abnormal situation by some modification of the medium. This was what I tried to make clear by a positive example of a kind which would leave no room for misunderstanding either the extent or the bearings of the conclusion.”

–Antoine Béchamp, *The Blood and its Third Anatomical Element* by Antoine Béchamp, 1912, Translated by Montague R. Lever-son, [WHALE Oct 2005]

“The ultimate foundation question of the science of bacteriology is, How did the disease germs become disease germs? But the question is still unanswered.”

–Woods Hutchinson. A.M., M.D. As quoted in *The Golden Calf: An Exposure of Vaccine-Therapy* By Charles W. Forward, Second Edition, 1933

“When by the attentive study of these facts one has become convinced that the microzymian theory is their pure and simple expression, it will be at once recognized that the cellule is already an organ in which, by nutrition, the conditions of the preservation of the microzymas with the constancy and regularity of their chemical and physiological functions are unceasingly realized. And it will thus be understood that the microzymian molecular granulations, whether of certain cellules, of the vitellus, or of the blood, also realize after their manner the conditions of this constancy and regularity. When these conditions are no longer realized they may undergo vibronian evolution.

“The most prominent fact in the history of the microzymas, that which has been the most disputed, precisely because of their capacity to undergo vibronian evolution, is the fact of their anatomical autonomy. Now this faculty, which is only manifested when the normal conditions of existence of the microzymas, functioning as anatomical elements, are no longer fulfilled, is the best proof which could be given of the change which has happened in their condition, causing their irregular and changed functioning.

“In fact, in their various anatomical situations, the microzymas remain morphologically similar to themselves. They function in each cellule, in each organ, in each anatomical system, naturally, chemically and physiologically for themselves while preserving their individuality; at the same time that by *coordination*, according to the happy and thoroughly scientific expression of Dr. Antoine Cros, they function for the benefit of the microzymian molecular granulations of the cellules, of the organs and of the various anatomical systems taken altogether, whose physiological condition of health is preserved by them.

“But if from some etiological cause certain changes happen in an organ, changes such as auscultation or percussion can precisely ascertain, as, for instance, an increase in the volume of the spleen, M. Cross tells us that there is a *decoordination*, a functional perturbation in the entire organism and disease. It is worth mentioning that from the time Dr. Cros became acquainted with the microzymian theory, he did not hesitate to recognize the microzymas as the anatomical agents of the decoordination; how does it happen?

“Among the causes which produce disease, a sudden chill in summer is the one most frequently indicated or invoked. The chill is at the same time an influence and a lowering of temperature. I do not insist on the fact that it is only something living which is painfully affected, so as to confine myself to the physical phenomenon. But the microzymas are very sensitive to variations of temperature; so much so that even the geological microzymas act regularly only at temperatures near 40 to 42 °C. (= 104 to 107 °F.); in fact, the microzymas of the chalk of Sens do not act so as to cause fecula to ferment in a temperature below 38 °C. (= 100.4 °F.). Further a very slight lowering of the temperature is sufficient for the egg which should produce a bird not to produce one, and to putrefy or to produce the monsters of Daresté when the heat is not uniformly applied. In fact, the influences of the medium (as if it should become neutral or acid), which modify the activity of the microzymas acting alone, are various. That which happens to the isolated microzymas happens also to those of the egg and for those of the organism. Suppress the air and the egg does not become a fowl, but undergoes another kind of change.

“If from any cause whatever the air does not have access or has an insufficient access to the pulmonary alveolae, and their *epithelium* becomes the pulmonary tubercle, the cellules become reduced to their microzymas, which are then found in vibronian evolution in the tubercle in the cretaceous state. If the *decoordination* resulting from an irregular functioning of a part of an anatomical system is sufficient to bring on a malaise which is not removed, there will arise a diseased condition because of a sharp change of the conditions of existence of the microzymian anatomical elements, and the change in the medium sufficient to cause the decoordination will manifest itself by the vibronian and bacterian evolution of the microzymas of such or such part of the system. It is thus that in the disease called “Sand de rate” (Anthrax), so thoroughly studied by Davaine, the diseased microzymas end by evolving into what that learned physician called bacteridiae, the blood globules undergoing the changes which are so characteristic. The bacteridiae were not the cause of the diseased condition, but were one of its effects; *proceeding* from the *morbid microzymas* they were capable of inducing this diseased condition in the animal whose microzymas were in a condition to receive it. Hence it is seen that the alteration of natural animal matters is spontaneous, and justifies the old aphorism so concisely expressed by Pidoux: “*Diseases are born of us and in us.*”

“On the other hand, the disregard of this law of nature, the firm establishment whereof is completed by the present work, necessarily led M. Pasteur to deny the truth of the aphorism, and to imagine a *pathogenic panspermy*, as he had before conceived, *a priori*, that there was a panspermy of fermentations. That M. Pasteur after having been a sponteparist should reach such a conclusion was natural enough; he was neither physiologist nor physician, but only a chemist without any knowledge of comparative science.

“What is astonishing is, that he should have succeeded in procuring the triumph of a preconceived system among physicians and in academies, and to procure the rejection of the microzymian theory [without examination. Trans.]. For instance, an enlightened physician thus summed up the fundamental proposition of M. Pasteur: “The microbes always come from without; they constitute species which remount from generation to generation up to the origin of the world.”

“An eminent surgeon, M. Verneuil, ended by admitting as a demonstrated theorem that there is no spontaneous tetanus, that there is no spontaneous small pox, syphilis, glanders, hydrophobia, tuberculosis, charbon or malignant

pustule; declaring that the pathogenic problem consisted solely in discovering how and when the *microbe*, also called virus, come from without, penetrates into the organism; declaring that the question is thus stated between old medicine and the microbial medicine “with extreme simplicity and without the least ambiguity”.

“But these assertions (of Surgeon Verneuil) are reduced to nothing, when we call to mind that the pretended germs of the air are only the microzymas of organisms which have disappeared, which had become bacteria by evolution; that even at the Academy of Medicine I said—and no one ventured to contradict me—that no one had ever been able to reproduce a disease on the nosological roll by taking the pretended pathogenic microbe in normal air, but only in the diseased animal. And I add, that just as with time the fibrin-ous microzymas lose the property of decomposing oxygenated water so, as proved long ago by Davaine, after a short time the blood of an animal which had died of anthrax [sang de rate] no longer communicated that diseased condition; and the same is true in all cases.

“THUS NORMAL AIR NOT ONLY DOES NOT, BUT CANNOT, CONTAIN THE PRETENDED PATHOGENIC MICROBES, AND THE VERY PRINCIPLE OF MICROBIAN MEDICINE CONSTITUTES A FUNDAMENTAL ERROR.”

–Antoine Béchamp, *The Blood and its Third Anatomical Element* by Antoine Béchamp, 1912, Translated by Montague R. Lever-son, [WHALE Oct 2005]

“Berthelot did not ascribe any role to these molecular granulations, and believing that he had performed the experiment “protected from contact with air”, he asserted, as in 1857, that the presence of calcic carbonate (*the chalk*) or of any alkaline bicarbonate directs the decomposition of the nitrogenised body (in this instance, the gelatine) in a certain manner which sets up the fermentation by regulating the steps of the phenomena. In short, Berthelot had not yet distinguished between the calcareous rocks (the chalk) and pure calcic carbonate, exactly like Pasteur in this matter, and did not yet believe that atmospheric germs had anything to do with the appearance of the molecular granulations. In short, he naturally believed that the lactic yeast of Pasteur was also constituted of molecular granulations, and that there was nothing to show that it was organized and living; as was the opinion of Pasteur, who, in 1858, stated that he had argued \*‘‘on the hypothesis\* that the new yeast was organized and living.”

“This, then, was the state of knowledge in 1860, and even much later. It was not known, although it already stood out from the facts of my memoir of 1857, and which the microzymian theory has since confirmed, that that which characterizes the fact of a living organization is not essentially, as the naturalists of the schools still believe, the establishment of the existence of some organ or structure, nor is it the presence of movement more or less spontaneous or voluntary in any living being whatever, or such as a microzyma, molecular granulation or lactic yeast, or such as a vibriionien. Rather, living organization is characterized by the property of producing and secreting zymases, each according to its nature or species; and the production of the chemico-physiological phenomena of transformation called fermentation, which are acts of nutrition, that is to say, of digestion, followed by absorption, assimilation, disassimilation, and so forth, and finally, the ability to reproduce itself if all conditions dependent upon nutrition are fulfilled.

“This is what Pasteur could not understand when he alleged in 1860 that the fermentation of cane sugar by beer yeast was correlative to the multiplication of the yeast, which is as great a physiological heresy as to imagine that an animal could be nourished upon sugar alone.

“But soon after, Pasteur, who had not yet explicitly invoked the germs in explanation of the alterations of organic matters and the production of the alterations of organic matters and the production of ferments, would explain by them what he had before explained by spontaneous generation; in short, he held my verification of the hypothesis to be so rigorously correct that in 1862 he published a memoir against spontaneous generation, wherein the alteration of all organic matters was explained as Schwann had done, by applying his method as improved by Claude Bernard.

“That was his second plagiarism.

“His experiments in the memoir of 1852 had been made with the organic substances treated, cooked, for the purpose of killing the germs which the air might have deposited upon them. In 1863 he repeated them upon blood and flesh, not cooked, for the purpose of proving that they did not contain germs capable of becoming vibrios, and that, without atmospheric germs, they would be unalterable. Not being able to heat flesh in the same manner as blood, he applied my method, substituting alcohol in the place of creosote.

“That was a third plagiarism. But he could not see the vibrioniens which, in spite of the antiseptic agent, were developed in the depths of the flesh, and he concluded that neither the blood nor muscle became putrid because the germs of the air were absent from them. And he regarded as proven that there was nothing living in the blood or in the flesh, and that all animal matters, without the germs of the air, would remain indefinitely unchanged.

“While Pasteur thus experimented, I continued to develop the consequences of my memoir of 1857. I demonstrated especially that not only were the atmospheric germs unnecessary for vinous fermentation, but that they were injurious, and that the grape carried normally, upon itself, the cellules of the ferments of the lees; not only the germs but the fully developed ferment. This was in 1864.

“At last, in 1865, I announced to Dumas the fact of the existence in the milk, and in the chalk, of the agent which is the cause of the spontaneous alteration of the former and of that which enables the second to act as lactic ferment, agents to which in the following year I gave the name of microzymas. Pasteur, who had been named a member of the commission upon my memoir upon the ferment of the chalk, said not a word, and I continued with Estor the study of the microzymas of the higher organisms up to applications to pathology, as may be seen in the postface. This was in 1870.

“In 1872 Pasteur attempted his boldest plagiarism; he discovered all of a sudden, eight years after my discovery thereof (I will state elsewhere on what occasion), that the ferment of vinous fermentation exists naturally upon the grape. In this connection he discovered also that plant and animal matters contain normally the things which cause them to alter spontaneously; that their cellules, without the atmospheric germs, are ferments. In other words, he repudiated his experiments and conclusions of 1862. He announced that his “new discoveries” would mark an epoch in general physiology; and he asserted that he had thrown a great light upon the phenomena of fermentation and “*had opened a new path to physiology and medical pathology.*”

“This was too much: up till that time I had treated the man with consideration; but now he must be properly exposed.

“First I, then Estor and I together, protested energetically. Our protests were inserted literally by Dumas and by Elie de Beaumont; the complete text can be read in the *Comptes Rendus*, Vol. LXXV, pp1284, 1519, 1523 and 1831. Pasteur replied by a subterfuge, to which we replied as follows: “We request the Academy to permit us to record that the observations inserted in the names of M. Béchamp and of ourselves remain unanswered.”

“Pasteur said no more, and abandoning “the new road” he pretended to have opened (a road which we showed we had not only opened but had sturdily traversed) he retraced his steps. Then, while since 1858 he had not disputed the meaning of any of the results, of any of the acts upon which the microzymian theory rests, results and facts which he knew to be exact and the discovery whereof he tried to ascribe to himself; then, I say, it was that he undertook in 1876 to explain them all by the atmospheric germs as he had “explained” them, in 1862, by spontaneous generation.

“He first evoked his experiment upon the blood in 1863, and, doubtless because Estor and I, after the discovery of the microzymas of the fibrin, had not thought it worth criticizing, he qualified it as *famous*(!), using it to deny even the existence of the microzymas. He then canvassed for approvers to maintain that uncooked milk, like the blood, is unalterable when preserved from contact with the natural air; that without atmospheric germs there would be neither fermentation nor disease, because there would be neither ferments nor microbes; for Pasteur, in spite of the inaccuracy of the etymology, had adopted this word with which to designate the micro-organisms.

“In short, Pasteur, who understood what he was about in this matter, ended by causing belief that things were as he wished they were, which as he himself has said, “is the greatest derangement of the mind.”

“The strangest part of the business is that it was believed, and that he was able to make the Academies his accomplices.

“It is true that he had at the same time organized the conspiracy of silence around the works related to the microzymian theory — so thoroughly, that one day, after a discussion during which I had attacked the principles of the microbial doctrines and had defended the microzymian theory, Cornil maintained that the discoveries of Pasteur had been verified in every country and that I was alone against all the world; to which I replied:

“ “It is not because everybody thinks so that it is true. I have demonstrated in an already old communication that the protoplasmic system, false in its principles, is false also in its consequences. It is so likewise with the microbial doctrines. For the dignity of science and of human reason it is time that they were abandoned!” ”

–Antoine Béchamp, *The Blood and its Third Anatomical Element* by Antoine Béchamp, 1912, Translated by Montague R. Lever-son, [WHALE Oct 2005]
