What You Are Not Being Told (This is Just the “Tip of the Iceberg”)

Introduction

I have created this brief document to provide some resources that will hopefully allow people to see the greater agenda that is (and has been) afoot for quite some time now. As the title suggests, the information here is only the “tip of the iceberg”. There is a whole lot more that is going on in the shadows.

This information is not fully discussed (or discussed at all) by the “corporament”.

In the USA, the “corporament” exists as the:

military (defense/offense) + industrial + academic (schooling — at all levels — as prison) + “corporament” entertainment (Hollywood, media, advertising/consumerism/commercialization, propaganda/psychological warfare) + judicial (defense and prosecutorial lawyers, judges, law enforcement/police, prisons) + financial (banks, accounting firms) + religion + petrochemical/pharmaceutical (drugs, antibiotics, antibacterials, vaccines, pesticides — toxins to kill or put you at “dis-ease” and drugs to “treat” you) + imperial commu-soci-capitofasdemorepubcracism system/society/economy/Western thinking = Military-industrial-academic-“corporament” entertainment-judicial-financial-religion-petrochemical/pharmaceutical complex.

Commu-soci-capitofasdemorepubcracism is derived from communism, socialism, capitalism, fascism, democracy, and republic as these concepts all have the same root. The complex was originally defined in the aforementioned article [https://www.utdailybeacon.com/opinion/our-government-can-not-be-trusted/article_81932d59-

[0861-5647-87b2-901d4d5cabd8.html](https://www.questionuniverse.com/oldway/columns.html) | Our government can not be trusted by Irucka Ajani Embry, Monday, 26 August 2002, *The Daily Beacon*. Also, the article can be found by searching at <https://www.questionuniverse.com/oldway/columns.html>], but it has been recently revised to reflect a new understanding of the complex's nature.

–Irucka Ajani Embry, piece entitled: “Attack of the ...”, page 103-104, from *Balancing the Rift: ReCONNECTualizing the Pasenture*, ISBN-13: 978-0-9914994-0-3 / ISBN-10: 0-9914994-0-9

Also, I am enclosing resources that will enable us, globally, to unite together as human beings, the human race, and regain our freedom & power from the global *e*lites that think that they control us because we have allowed them to develop that false conclusion.

It's past time for the Human Race To Get Off Our Knees [see *Human Race Get Off Your Knees: The Lion Sleeps No More* By David Icke – <https://shop.davidicke.com>]

We are All Infinite Consciousness having an Experience as ... [see *Remember Who You Are: Remember 'Where' You Are and Where You 'Come' from: Remember ...* By David Icke – <https://shop.davidicke.com>]

Thank you.

Quotes That Hopefully Cause Us to Question the Safety & Efficacy of Past, Present, and Future Vaccination Campaigns

“Forced vaccination *is* rape - a conclusion, herein, that is a result of a *systems of systems* analysis that intersects both: (1) a biological systems understanding, which recognizes that pores on the human skin - approximately 5 million - are “orifices”; and, (2) a legal systems understanding wherein rape is defined as “...penetration of *any bodily orifice* by any body part or by any object, against a person’s will or without consent, and with threat or actual use of force.”{1} This conclusion affords potential victims of forced vaccination the opportunity to employ existing legal remedies such as Harassment Prevention Orders to prohibit forced vaccination - as such action constitutes rape or a threat of rape - commonly known as *rape threat*. To the best of the author’s knowledge, the analysis and results herein defining forced vaccination as rape by intersecting both the biological systems understanding of pores on the skin as orifices, and the legal systems definition of rape, are the first of its kind.”

“First, we’ve got population. The world today has 6.8 billion people. That’s headed up to about nine billion. Now, if we do a really great job on **new vaccines, health care, reproductive health services** [my emphasis], we could lower that by, perhaps, 10 or 15 percent. But there, we see an increase of about 1.3.”

“Corona virus — COVID-19, which is an acronym that stands for, “Certificate Of Vaccination Identification (C.O.V.I.D.) — Artificial Intelligence (1 represents the first letter in the alphabet = A and 9 represents the ninth letter in the alphabet = I).” ”

-Robert O. Young, CPT, MS, D.SC., Ph.D., Posted on 04/23/2020, pHowever Young Blog: The Corona Virus is Just a Concept That Only Exists on Paper [<https://phoreveryoung.wordpress.com/2020/04/23/the-corona-virus-is-just-a-concept-that-only-exists-on-paper/>]

“Here is one example of how the trick may play out. A toxin creates a disease. The toxin might be pesticides or industrial pollution or wireless technology radiation. The toxin damages millions of people and their communities. Companies or their insurance provider may be liable for civil or criminal violations. Then a virus is blamed. A “cure” is found in a “vaccine.” The pesticide or other toxic exposure is halted just as the vaccine is introduced, and presto, the sickness goes away. The vaccine is declared a success, and the inventor is declared a hero. A potential financial catastrophe has been converted to a profit, including for investors and pension funds. As a portfolio strategist, I admit it has been a brilliant trick and likely has protected the insurance industry from the bankrupting losses it would experience if it had to fairly compensate the people and families destroyed.”

-Catherine Austin Fitts, May 27, 2020, Solari Report: The Injection Fraud — It’s Not a Vaccine [<https://home.solari.com/deep-state-tactics-101-the-covid-injection-fraud-its-not-a-vaccine/>]

“Medical research, no matter how much effort, money and dedication goes into it, always seems to give us a deceptive answer. There are a lot of promises in the beginning which more often than not end up in disasters. The problem is that many times the medical drugs used to manipulate the human body are so deep and insidious in their effects that when we finally perceive their long-term side effects, it is usually too late; the damage has already been done.

“Today everybody thinks that it was only thalidomide and a handful of other drugs that have been harmful, while everything else is considered safe and”innocent.” Thalidomide showed its appalling effects upon the human organism in quite a short time because it was a very crude drug. This was the reason why it was soon recognized and isolated, though not without leaving some very tragic consequences in its wake. Can you imagine what could have happened if its effects had not been discovered when they were?

“What we have to understand is that all chemical drugs, no matter how innocent they may appear in the beginning, are bound to have some type of effect, be it large or small, on the human organism. Some drugs or vaccinations may have such a subtle and insidious influence upon the body that their side effects may be apparent only five to ten years later.

“In 1978, in my book *The Science of Homeopathy*, I advanced the theory that vaccinations deeply disturb the organism before they can protect it from a specific disease. But few have asked about the long-term effects of vaccinations. Who can really calculate the net profit or loss from such practice? We all know that vaccinations are”addressed” to the immune system and that their aim is to “force” it to produce antibodies to protect the organism from future attacks of a specific infectious disease.

“This idea was really”clever,” but the question still remains for future generations to answer whether it was clever enough to outsmart nature.

“Several other questions which will take a long time to answer are:

- “Can nature (the organism), under the stress of a vaccine, suffer an unpredictable reaction which arranges its deeper structures of defense, such as the reticuloendothelial, immune, sympathetic and parasympathetic systems, such that it can no longer defend itself from future diseases of a different type?

- “Is it possible that by using such powerful agents we are accelerating the body’s manifestation of its latent predisposition for chronic diseases?”
- “Who can foretell, with any degree of certainty, the long-range consequences of such subtle intervention in the innermost workings of the human organism?”

“In my teachings, I have alluded repeatedly to the fact that we have meddled in an unwise and serious manner with the immune system, and that it is possible the present “explosion” of some of the most terrifying chronic diseases of our times—like multiple sclerosis, cancer and rheumatoid arthritis—may have been precipitated largely by certain vaccinations. Such practices may have consequences that appear ten to fifteen years after the initial vaccination, which I believe is the case with multiple sclerosis.

–*A New Model for Health and Disease: Suggesting an Explanation for the Explosion of: AIDS, Cancer, Asthma, Candida, Epilepsy, Alzheimer’s, Tuberculosis, Schizophrenia, Multiple Sclerosis, Allergic Conditions, Rheumatoid Arthritis, Chronic Fatigue Syndrome* New Expanded Edition, By George Vithoulkas, North Sporades, Greece: International Academy of Classical Homeopathy, 2008, Pages 169-171, ISBN # 1-55643-087-6

“This brief statement of the early history of vaccination has been introduced here in order to give what seems to be a probable explanation of the remarkable fact that a large portion of the medical profession accepted, as proved, that vaccination protected against a subsequent inoculation of small-pox, when in reality there was no such proof, as the subsequent history of small-pox epidemics has shown. The medical and other members of the Royal Commission could not realize the possibility of such a failure to get at the truth. Again and again they asked the witnesses above referred to to explain how it was possible that so many educated specialists could be thus deceived. They overlooked the fact that a century ago was, as regards the majority of the medical profession, a pre-scientific age; and nothing proves this more clearly than the absence of any systematic “control” experiments, and the extreme haste with which some of the heads of the profession expressed their belief in the lifelong protection against small-pox afforded by vaccination, only four years after the discovery had been first announced. This testimony caused Parliament to vote Jenner £10,000 in 1802.

“Ample proof now exists of the fallacy of this belief, since vaccination gives no protection (except perhaps for a month or two) as will be shown later on. But there was also no lack of proof in the first ten years of the century; and had it not been for the unscientific haste of the medical witnesses to declare that vaccination protected against small-pox during a whole lifetime—a fact of which they had not and could not possibly have any evidence—this proof of failure would have convinced them and have prevented what is really one of the scandals of the nineteenth century. These early proofs of failure will be now briefly indicated.

“Only six years after the announcement of vaccination, in 1804, Dr. B. Moseley, Physician to Chelsea Hospital, published a small book on the cow-pox, containing many cases of persons who had been properly vaccinated and had afterward had small-pox; and other cases of severe illness, injury, and even death resulting from vaccination; and these failures were admitted by the Royal Jennerian Society in their Report in 1806. Dr. William Rowley, Physician to the St. Marylebone Infirmary, in a work on “Cow-pox Inoculation” in 1805, which reached a third edition in 1806, gave particulars of 504 cases of small-pox and injury after vaccination, with seventy-five deaths. He says to his brother medical men: “Come and see. I have lately had some of the worst species of malignant small-pox in the Marylebone Infirmary, which many of the faculty have examined and know to have been vaccinated.” For two days he had an exhibition in his Lecture Room of a number of children suffering from terrible eruptions and other diseases after vaccination.

“Dr. Squirrel, formerly Resident Apothecary to the Small-pox Inoculation Hospital, also published in 1805 numerous cases of small-pox, injuries, and death after vaccination.

“John Birch, a London surgeon, at first adopted vaccination and corresponded with Jenner, but soon finding that it did not protect from small-pox and that it also produced serious and sometimes fatal diseases, he became one of

its strongest opponents, and published many letters and pamphlets against it up to the time of his death in 1815.

“Mr. William Goldson, a surgeon at Portsea, published a pamphlet in 1804, giving many cases in his own experience of small-pox following vaccination. What made his testimony more important was that he was a believer in vaccination, and sent accounts of some of his cases to Jenner so early as 1802, but no notice was taken of them.
1

“1 The cases of failure of vaccination here referred to are given in Mr. William White’s “Story of a Great Delusion,” [Refer to the section on books for the referenced text] where fuller extracts and references will be found.

“Mr. Thomas Brown, a surgeon of Musselburgh, published in 1809 a volume giving his experiences of the results of vaccination. He had at first accepted and practised it. He also applied the “variolous test,” with apparent success, and thereafter went on vaccinating in full confidence that it was protective against small-pox, till 1808, when, during an epidemic, many of his patients caught the disease from two to eight years after vaccination. He gives the details of forty-eight cases, all within his own personal knowledge, and he says he knew of many others. He then again tried the “variolous test,” and found twelve cases in which it entirely failed, the result being exactly as with those who were inoculated without previous vaccination. These cases, with extracts from Brown’s work, were brought before the Royal Commission by Professor Crookshank. (See 4th Report, Q. 11,852.)

“Again, Mr. William Tebb brought before the Commission a paper by Dr. Maclean, in the *Medical Observer* of 1810, giving 535 cases of small-pox after vaccination, of which 97 were fatal. He also gave 150 cases of diseases from cow-pox, with the names of ten medical men, including two Professors of Anatomy, who had suffered in their own families from vaccination. The following striking passage is quoted:” *Doctrine.*—Vaccination or Cow-pox inoculation is a perfect preventive of small-pox during life. (Jenner, etc.) *Refutation.*—535 cases of small-pox after cow-pox. *Doctrine.*—Cow-pox renders small-pox milder. It is never fatal. *Refutation.* 97 deaths from small-pox after cow-pox and from cow-pox diseases.”

“The cases here referred to, of failure of vaccination to protect even for a few years, are probably only a small fraction of those that occurred, since only in exceptional cases would a doctor be able to keep his patients in view, and only one doctor here and there would publish his observations. The controversy was carried on with unusual virulence; hence perhaps the reason why the public paid so little attention to it. But unfortunately both the heads of the medical profession and the legislature had committed themselves by recognizing the full claims of Jenner at too early a date and in a manner that admitted of no recall. In 1802, as already stated, the House of Commons, on the Report of its Committee, and the evidence of the leading physicians and surgeons of London—a large number of whom declared their belief that cow-pox was a perfect security against small-pox—voted Jenner £10,000. When therefore the flood of evidence poured in, showing that it did *not* protect, it was already too late to remedy the mischief that had been done, since the profession would not so soon acknowledge its mistake, nor would the legislature admit having hastily voted away the public money without adequate reason. The vaccinators went on vaccinating, the House of Commons gave Jenner £20,000 more in 1807, endowed vaccination with £3000 a year in 1808, and after providing for free vaccination in 1840, made the operation compulsory in 1853 by a fine, and ordered the Guardians to prosecute in 1867.”

–*The Wonderful Century: Its Successes and Its Failures* By Alfred Russel Wallace, 1899, pages 218-222, <https://archive.org/details/wonderfulcentury028485mbp/mode/2up>

“It will thus be seen that Jenner completely abandoned his false and reckless claim of *perfect protection* from smallpox *for life* by *one vaccination*, for which he got his big graft or money prize from the English government: but, please note, he did not make this retreat or acknowledge his great mistake until after he had pocketed his **big reward of thirty thousand pounds** [my emphasis] for his shamefully false claim of the unlimited protection and perfect safety of vaccination.”

–*Horrors of Vaccination Exposed and Illustrated: Petition to the President to Abolish Compulsory Vaccination in Army and Navy*
By Chas M. Higgins, 1920, page 187, https://www.forgottenbooks.com/en/books/HorrorsOfVaccinationExposedandIllustrated_10777320

“Friends and well wishers of Duon H. Miller, the Florida cosmetic manufacturer who spent many thousands of dollars of his own money to warn the American public against the lethal effects of Salk vaccine, its worthlessness as a preventive, the false propaganda of the serum trust and the doctored”statistics” of the US Public Health Service, will be glad to know that he is now off the hook.

“Upon demand of the National Foundation for Infantile Paralysis, whose racket he was seriously interfering with, he was railroaded by a Federal Court in Florida after the Post Office Dept. was importuned to go far afield and split hairs to convict him of sending out”derogatory statements” about the Salk racketeers on a postal card.

“There actually is a P0 regulation which says that such statements are all right in sealed mail, but”unmailable” on postal cards. The usual procedure is for postal inspectors to notify the “culprit” and have him sign a stipulation not to do it again. We know this from personal experience. In the Miller case this was not done, because of pressure from NFIP and those who own the serum trust—the House of Rockefeller.

“Miller was given a 2-year prison sentence and placed on probation for two years in July of 1955. It was admitted by the”prosecution” that its main object was to stop him from telling the truth about Salk vaccine. So, terms of the probation were that he was not to send anything thru the mails having the slightest reference to vaccine or medicine of any sort.

“This (illegally) revoked his rights to freedom of speech and press granted him by the First Amendt to the Consti-tution. This was so raw that the judge has been prevailed upon to declare the Constitution again in effect. His probation thereupon was”lifted” January 28 instead of causing it to run its full course to July 1957. This also lets the judge off the hook because Congress could have filed impeachment charges against him for violation of his oath in abrogating the Constitution.

“The serum trust is getting desperate. They saw in the Miller”prosecution” a warning to all who dared to tell the truth about their deadly racket, so they “went to town” in making it. It now develops they have a “stockpile” for 25,000,000 of these deadly “shots” which they can’t dispose of, even with the fake statistics put out by the US Public Health Service and reprinted widely by the medical and general press.

“To dispose of it, they are now resorting to circus methods. They prevailed on a church in Cleveland to help them interfere with God’s work by advertising”coffee, cookies and Salk shots.” In Michigan their lobbyists had a bill introduced in the legislature to force the inoculation of all school children. They told the legislature “\$2,000,000 worth of Salk shots” is spoiling. In New Jersey they have a similar bill.

“They even prevailed on Mr. Eisenhower to use the high office of the Presidency as a huckster stand. By words put in his mouth by serum trust press agents, lke urged everybody—adults and children—to have three polio shots”while supplies are now plentiful.” The royal medics in London hooked Good Queen Bess into having her two children’s health interfered with by polio shots— amid a fanfare of press and radio hokum.

“While they were selling these deadly shots like hotcakes, the serum trust was announcing (thru their stooges in the USPHS) that Salk vaccine”has polio under control.” They now say “polio is far from conquered.” They have 25,000,000 shots for sale, with a profit of more than \$5 a “shot” involved.”

–WHALE: Vaccine Economics — as quoted by American Capsule News, Washington, D. C. February 9, 1957. Addendum to *The Poisoned Needle* by Eleanor McBean [<http://www.whale.to/a/bealle3.html>]

“In order to teach the drug and serum ideology it is necessary to teach that God didn’t know what he was doing when he made the human body. Statistics issued by the Children’s Bureau of the Federal Security Agency do not bear out this ideology. They show that since the all-out drive of the drug trust for drugging, vaccinating and serumizing the human system, the health of our nation has declined enormously, especially among children.

“Children are now given”shots” for this and “shots” for that, when the only immunity known to science is a healthy human body and a pure blood stream. Ponder these government findings:

- “Nearly half a million children are affected by rheumatic fever.
- “Ten million boys and girls under 21 have defective vision.
- “A half million have orthopedic or spastic conditions.
- “Two million have impaired hearing.
- “Seventeen thousand are deaf.
- “Four hundred thousand have tuberculosis.
- “Seventy-five percent have dental defects.
- “Three out of every 100 draft registrants (18 and 19 years old) had heart trouble.
- “Three out of every hundred had a mental disease.
- “Two out of every 100 had a neurological difficulty.
- “Ten out of every 100 had defective vision.
- “One out of 40 had defective hearing.

“These conditions didn’t exist in the youth of today’s middle aged and old people. Vaccination was the only unnatural practice then and most of us had enough vitality eventually to throw off the effects of this blood pollution. But if we had quadrupled or decupled this dose, as is being done to children today, our present middle aged people probably would be old and our present old people dead.”

–*The Drug Story: A Factological History of America’s \$10,000,000,000 Drug Cartel — Its Methods, Operations, Hidden Ownership, Profits and Terrific Impact on the Health of the American People* By Morris A. Bealle, 1949 [<http://www.whale.to/a/bealle.htm>]

“All is danger in this kind of experimentation, for the reason that it is not anything inert that is acted upon, but that there is a modification, more or less injurious, of the microzymas of the inoculated.”

–*Les Microzymas* By Antoine Béchamp, page 902. As quoted in *Béchamp or Pasteur?: A Lost Chapter in the History of Biology* By Ethel D. Hume on page 338 [prefaced by *Pasteur: Plagiarist, Imposter: The Germ Theory Exploded* By R. B. Pearson], ISBN# 978-1-46790-012-6, 2011

“With the increased use of therapeutic serums in the past twenty years, much has been written of the various manifestations of anaphylaxis. Urticaria, arthralgia, adenopathy and cardiac collapse are well known complications of serum therapy. Coma and occasionally death have been reported following serum injection. Many reports of multiple neuritis and myelitis following the use of Pasteur treatment have appeared, and encephalitis following vaccination is well known. Another unpleasant complication of prophylactic efforts, and fortunately one less frequently seen, is multiple neuritis.”

–George Wilson, M.D. and Samuel B. Hadden, M.D., *Neuritis and Multiple Neuritis Following Serum Therapy*, *JAMA*. 1932;98(2):123–125, January 9, 1932 [<https://jamanetwork.com/journals/jama/article-abstract/1153665>]. Also archived at <https://archive.vn/Nw4nq>.

“The Danger of Inoculating”

“Formerly, notwithstanding the generally ignorant use of drugs by the medical profession, the efforts of the physician, mistaken though they generally were, were really directed exclusively to heal the sick. From the time of Pasteur’s predecessor in quackery —Ed. Jenner—and during the growth of Pasteur’s superstition right down to this day, the efforts of the large majority of the profession and of all the official doctors, except those officially employed in promoting sanitation, have been and are engaged in efforts to make sick the well. By poisonous sera of all sorts they pretend to seek to protect the well against diseased conditions which would scarcely ever happen to them were their vitality not reduced by poison poured into their blood, whereby their vitality is lowered and their constitutions often permanently debased. Let me call attention to the folly of all these inoculations.”

“When a drug is administered by the mouth, as was beautifully pointed out by Dr. J. J. Garth Wilkinson, in proceeding along the alimentary canal, it encounters along its whole line a series of chemical laboratories, wherein it is analysed, synthesized, and deleterious matter prepared for excretion, and finally excreted, or it may be ejected from the stomach, or overcome by an antidote. But when Nature’s coat of mail, the skin, is violated, and the drug inserted beneath the skin, Nature’s line of defence is taken in the rear and rarely can anything be done to hinder or prevent the action of the drug, no matter how injurious, even fatal, it may be. All the physicians of the world are incompetent either to foresee its action or to hinder it. Even pure water has been known to act as a violent and foudroyant poison when injected into the blood stream. How much more dangerous is it, then, to inject poisons known to be such, whether modified in the fanciful manner at present fashionable among Vivisectionists, or in any other manner. These simple considerations show that inoculation should be regarded as malpractice, to be tolerated only in case of extreme danger where the educated physician sees no other chance of saving life.”

–*Pasteur the Plagiarist: The Debt of Science to Béchamp* by Dr. Montague R. Levenson, 1911. Delivered at Claridges Hotel, London, England on May 25, 1911, pages 11-13 [<https://babel.hathitrust.org/cgi/pt?id=mdp.39015081399316&view=1up&seq=1>]

“VACCINATION.”

““When once you interfere with the order of Nature there is no knowing where the results will end,” was the remark made in my presence by a distinguished biologist. There immediately escaped from him an expression of vexation at his lack of reticence, for he saw the various uses I might make of the admission.

“Jenner and his disciples have assumed that when the vaccine virus has passed through a patient’s system he is safe, or comparatively safe, against small-pox, and that there the matter ends. I will not here say anything for or against this assumption.* I merely propose to show that there the matter does *not* end. The interference with the order of Nature has various sequences other than that counted upon. Some have been made known.

“A Parliamentary Return issued in 1880 (No. 392) shows that comparing the quinquennial periods 1847-1851 and 1874-1878 there was in the latter a diminution in the deaths from all causes of infants under one year old of 6,600 per million births per annum; while the mortality caused by eight specified diseases, either directly communicable or exacerbated by the effects of vaccination, increased from 20,524 to 41,358 per million births per annum — more than double. It is clear that far more were killed by these other diseases than were saved from small-pox.*

- “Except, indeed, by quoting the statement of a well-known man, Mr. Kegan Paul the publisher, respecting his own experience. In his *Memories* (pp. 260-1) he says, respecting his small-pox when adult, “I had had small-pox when a child, in spite of vaccination, and had been vaccinated but a short time before. I am the third of my own immediate family who have had small-pox twice, and with whom vaccination has always taken.”

“To the communication of diseases thus demonstrated, must be added accompanying effects. It is held that the immunity produced by vaccination implies some change in the components of the body: a necessary assumption. But now if the substances composing the body, solid or liquid or both, have been so modified as to leave them no longer liable to small-pox, is the modification otherwise inoperative? Will any one dare to say that it produces

no further effect than that of shielding the patient from a particular disease? You cannot change the constitution in relation to one invading agent and leave it unchanged in regard to all other invading agents. What must the change be? There are cases of unhealthy persons in whom a serious disease, as typhoid fever, is followed by improved health. But these are not normal cases; if they were a healthy person would become more healthy by having a succession of diseases. Hence, as a constitution modified by vaccination is not made more able to resist perturbing influences in general, it must be made less able. Heat and cold and wet and atmospheric changes tend ever to disturb the balance, as do also various foods, excessive exertion, mental strain. We have no means of measuring alterations in resisting power, and hence they commonly pass unremarked. There are, however, evidences of a general relative debility. Measles is a severer disease than it used to be, and deaths from it are very numerous. Influenza yields proof. Sixty years ago, when at long intervals an epidemic occurred, it seized but few, was not severe, and left no serious *sequelae*; now it is permanently established, affects multitudes in extreme forms, and often leaves damaged constitutions. The disease is the same, but there is less ability to withstand it.

- “This was in the days of arm-to-arm vaccination, when medical men were certain that other diseases (syphilis, for instance) could not be communicated through the vaccine virus. Any one who looks into the Transactions of the Epidemiological Society of some thirty years ago, will find that they were suddenly convinced to the contrary by a dreadful case of wholesale syphilization. In these days of calf-lymph vaccination such dangers are excluded: not that of bovine tuberculosis however. But I name the fact as showing what amount of faith is to be placed in medical opinion.

“There are other significant facts. It is a familiar biological truth that the organs of sense and the teeth arise out of the dermal layer of the embryo. Hence abnormalities affect all of them: blue-eyed cats are deaf and hairless dogs have imperfect teeth. (*Origin of Species* Chap. I.) The like holds of constitutional abnormalities caused by disease. Syphilis in its earlier stages is a skin-disease. When it is inherited the effects are malformation of teeth and in later years iritis (inflammation of the iris). Kindred relations hold with other skin-diseases: instance the fact that scarlet fever is often accompanied by loosening of the teeth, and the fact that with measles, often go disorders, sometimes temporary sometimes permanent, of both eyes and ears. May it not be thus with another skin-disease — that which vaccination gives? If so, we have an explanation of the frightful degeneracy of teeth among young people in recent times ; and we need not wonder at the prevalence of weak and defective eyes among them. Be these suggestions true or not, one thing is certain:— the assumption that vaccination changes the constitution in relation to small-pox and does not otherwise change it is sheer folly.*

- “A high authority, Sir James Paget, in his *Lectures* (4th ed. p. 89) says:—”After the vaccine and other infectious or inoculable diseases, it is, most probably, not the tissues alone, but the blood as much or more than they, in which the altered state is maintained; and in many cases it would seem that, whatever materials are added to the blood, the stamp once impressed by one of these specific diseases is retained.” Here is a distinct admission, or rather assertion, that the constitution is changed. Is it changed for the better? If not, it must be changed for the worse.”

–*Facts and Comments* By Herbert Spencer, 1902, pages 270-273 [<https://archive.org/details/factsandcomment01spengooq>]

Basic Questions About the Vaccination\$ Scam

- 1) Is any individual, corporation, government agency, international agency, institution, etc. legally liable for the adverse reactions, including deaths, caused by recommending and/or requiring that people receive one of the numerous “COVID-19” vaccines due to a non-existent threat from a non-existent “coronavirus”?
- 2) In the United States of America, do people have the right to refuse a vaccine that is currently under an Emergency Use Authorization (EUA)? If so, then are people advised about their rights (proper informed consent)?

- 3) In other countries of the world, do people have the right to refuse a vaccine? If so, then are people advised about their rights (proper informed consent)?
- 4) What does the Nuremberg Code say about human experimentation and informed consent? Has any so-called “health authority” promoting the fraudulent “germ theory of disease causation” & vaccination campaigns provided people with proper informed consent? If not, then why not?
- 5) What do the various international laws say about rape [Dr. Shiva Ayyadurai, MIT PhD argues that forced/mandatory vaccination is rape.]? Are there legal protections provided to Human Beings around the world to avoid being raped, in this case, by a syringe and/or genetically-modified mosquitoes? If so, then what are the legal protections? If not, then why don't those legal protections exist?
- 6) What do the various federal laws, State/Commonwealth laws, etc. say about rape [Dr. Shiva Ayyadurai, MIT PhD argues that forced/mandatory vaccination is rape.]? Are there legal protections provided to Human Beings in the United States of America to avoid being raped, in this case, by a syringe and/or genetically-modified mosquitoes? If so, then what are the legal protections? If not, then why don't those legal protections exist?
- 7) Has any “health” authority in the world been successful at isolating the “SARS-CoV-2 virus” (“coronavirus”) from “patient-zero” in Wuhan, China? If not, then why not? ¹
- 8) Was that isolated “virus” used in the production of the numerous “COVID-19” vaccines? If not, then why not? If not, then what genetic material, if any, is being used in the vaccines? ²
- 9) Do any of the United States Food & Drug Administration (FDA) Emergency Use Authorization (EUA) vaccination\$ contain genetically engineered components? If so, then which ones do? If so, then is this information provided to the general public as well as to the FDA? If it's not being provided to both the general public and the FDA, then why not? ³
- 10) Do any of the United States Food & Drug Administration (FDA) Emergency Use Authorization (EUA) vaccination\$ contain nanotechnology, including, but not limited to, nanoparticles? If so, then which ones do? If so, then is this information provided to the general public as well as to the FDA? If it's not being provided to both the general public and the FDA, then why not? ⁴
- 11) Are the genetically engineered mosquitoes that have been approved for release in Florida (and elsewhere?) been given the ability to inject the unsuspecting public with any COVID-19 vaccine(s)? If so, then which vaccine(s)? ⁵
- 12) Does the FDA recommend any technique(s) so that people can remove the genetically-altered particles and/or nanotechnology from our bodies safely and effectively? If not, then why not since the FDA has allowed this contamination to enter the EUA vaccines (and possibly previous vaccines)? ⁶
- 13) As it has been previously documented that genetic engineering is not completely safe, then why has the FDA allowed genetically engineered ingredients in vaccines? ⁷

- 14) As it has been previously documented that nanotechnology is not completely safe, then why has the FDA allowed nano ingredients in vaccines? ⁸
- 15) If the CDC, NIH, and/or FDA can not fully satisfy Robert Koch's Postulates for the SAR-COV-2 virus, then does an emergency actually exist? ⁹
- 16) If an emergency does not exist, then have employees and/or contractors of the CDC, NIH, and/or FDA committed scientific fraud using federal government funds? ¹⁰
- 17) If an emergency does not exist, then why are vaccine passports needed? ¹¹
- 18) If an emergency does not exist, then why have vaccines been rushed through without going through the usual approval process for a new vaccine? ¹²
- 19) If an emergency does not exist, then why are vaccines needed for every Human Being on this planet? ¹³
- 20) If an emergency does not exist and since people have died from the EUA vaccines in the ongoing clinical trials, then who is liable for the deaths of those people? Also, who is liable for all of the people that have suffered other adverse reactions? ¹⁴
- 21) As it seems that no one has ever successfully isolated and purified a "virus", what genetic material, if any, is actually used in vaccines? Why have vaccine manufacturers continued to lie about the contents of vaccines? Why have we, the People of the world, allowed this shenanigan to keep going on?
- 22) Are all of the active and/or inactive ingredients, including possible contaminants, listed on the product label for each & every single vaccine? If not, then why not? [Please refer to the **Ingredients of Vaccines** section.]
- 23) How many people have been adversely affected, including dying, from the applications of the fraudulent "germ theory of disease causation" and its affiliates (antibiotics, antibacterials, vaccines/serums/inoculations/anti-toxins, etc.) over the past several centuries? ¹⁵
- 24) After objectively reviewing the occult history of vaccines/serums/inoculations/anti-toxins, can a sane Human Being really believe that those products are "safe and effective"?
- 25) From Edward Jenner to the current charlatans pushing the "murderous injections"/deadly vaccines, can it be assumed that making profits has been a strategic part of the vaccination campaigns?
- 26) Why would any sane person use a poisonous vaccine to treat any dis-ease? Why would any sane person think that this method of treating dis-ease will not create more dis-ease in the people, including non-human animals, given such an experimental technology?

- 27) Within the United States of America (USA), what is the legal definition of a vaccine? Do any of the “COVID-19” Emergency Use Authorized (EUA) only vaccines meet the legal definition of a vaccine? If not, then why not? If not, then why are those products fraudulently labeled?
- 28) In other countries of the world, what is the legal definition of a vaccine? Do any of the “COVID-19” vaccines meet the legal definition of a vaccine? If not, then why not? If not, then why are those products fraudulently labeled?
- 29) If a Human Being or other animal is administered a vaccine and he or she dies (or suffers other adverse reactions) within seconds, minutes, or up to 72 hours after receiving the shot(s), is there a correlation between that person’s death & the vaccine(s)? If this happens, then who is legally liable for either this person’s death or their dis-eased state?
- 30) Are we just seen as disposable guinea pigs still? If so, then why?
- 31) Why aren’t more people all around the world asking these & other questions?

Children’s Health Defense: Creator of mRNA Vaccine Technology Tells Tucker Carlson: ‘Government Not Being Transparent’ About Vaccine Risks: Dr. Robert Malone told Tucker Carlson we know the vaccines pose risks, but it’s hard to assess them because the government isn’t capturing the data “rigorously enough,” so we don’t have the information we need to make a reasonable decision. 06/24/21
